

## ***BUTT JOINT DETAILS***

One of the corner joints **DBS** offers is Butt Joint / Nailed and glued construction. We use only high quality, state-of-the-art production equipment to produce this detail.

### **TECHNICAL ASPECTS:**

- The corners are glued and pin nailed.
- The sides are rabbetted to ensure dimensions and a clean glue joint.
- The drawer sides are full length and nailed into the front and back of the drawer.
- The top edges of the sides, fronts and backs are all flush.
- Standard bottom construction is let in on four sides. Bottom mount construction is also available.
- If a recessed bottom is selected, hot melt is available but must be requested.
- This is an economical corner construction and works well with all types of plywood and pre-laminated materials.

### **SIZING:**

	Minimum	Maximum	Measured to
Width	2"	49.99" Assembled Open Unassembled	1/32"
Depth	4"	40" Assembled Open Unassembled	1/4"
Height	1/2"	30" Assembled Open Unassembled	1/8"

### **RECOMMENDATIONS:**

This corner joint works well with all types of cabinetry or furniture where quality and economy are equally important.
